

AMULET

Presentazione seconda Open Call

CLUST-ER MECH – AUTOMOTIVE & MANUFACTURING

About AMULET

- AMULET builds upon the framework of the INNOSUP-01 programme for H2020, which aims to develop new cross-sectoral industrial value chains by fostering the collaboration & integration of SMEs through the active participation of clusters.
- The ultimate goal of AMULET is to significantly **contribute to CO₂ emissions reduction** in the EU by **boosting the role of SMEs**.
- New lightweight value chains are going to be created by fostering the use and penetration of **3 types of materials** in **4 targeted sectors**

The 3 types of materials

polymer-based
composites

ceramic matrix
composites

light metal alloys

The 4 targeted sectors

building

aerospace &
aeronautics

energy

automotive

		Fiber-reinforced polymers	Ceramic matrix composites	Light metal alloys
				
Aerospace & Aeronautics		8	2	2
Energy		5	2	2
Automotive		6	1	2
Building		1	2	1

2nd Open Call

- **SME consortia** consisting of **2 or 3 SMEs**
- Funding instrument includes a **lump-sum grant of up to 120,000€ per project (60k€ per SME)**
- **Up to 7 SME consortia** will complete the full program (all 3 stages)
- Duration of the **full program 15 months**
- The proposals aiming to reach **Technology Readiness Level (TRL) 7, starting from TRL 4-5.**
- Applications should **address (exactly) one of the Open Challenges**

Thematic competitions

2nd Open Call:

10th of January – 22nd of March

APPLICATIONS

-  3 online matchmaking events
-  Open: 10th January – 22nd March 2023
-  36 challenges
-  Aprox. 36 solutions invited to the Jury Day online

FEASIBILITY STUDY

-  Up to 25 consortia move forward to submit a feasibility study
-  Duration: 4 months
-  10 pages
-  €23,000 (per consortia)

DEMONSTRATION

-  Up to 7 consortia move forward to demonstrate their solutions
-  Duration: 9 months
-  €80,000 (per consortia)

FOLLOW UP SUPPORT FOR INNOVATION

-  A more customized and tailored educational program will be made available to the best up to 7 SME consortia
-  Duration: 2 months
-  €17,000 (per consortia)

Stage 1

Feasibility study

- **Output: Proof of concept** - detailed plan for demonstration (Stage 2) and exploitation (Stage 3) as well as the updated project-specific technical and business indicators (document <10 pages)
- **Activities:**
 - preliminary analyses to develop the solution,
 - solution description,
 - market analysis and impact,
 - organisational structure (e.g. requirements, resources needed),
 - preparation of timeline and financial projections.

Stage 2

Demonstration

- **Output: Physical prototype(s)** and results from the **validation** (report)
- **Activities:**
 - manufacturing of prototype parts and components,
 - characterization, simulation and modelling,
 - prototype integration into system,
 - technical testing,
 - verification of the solution.

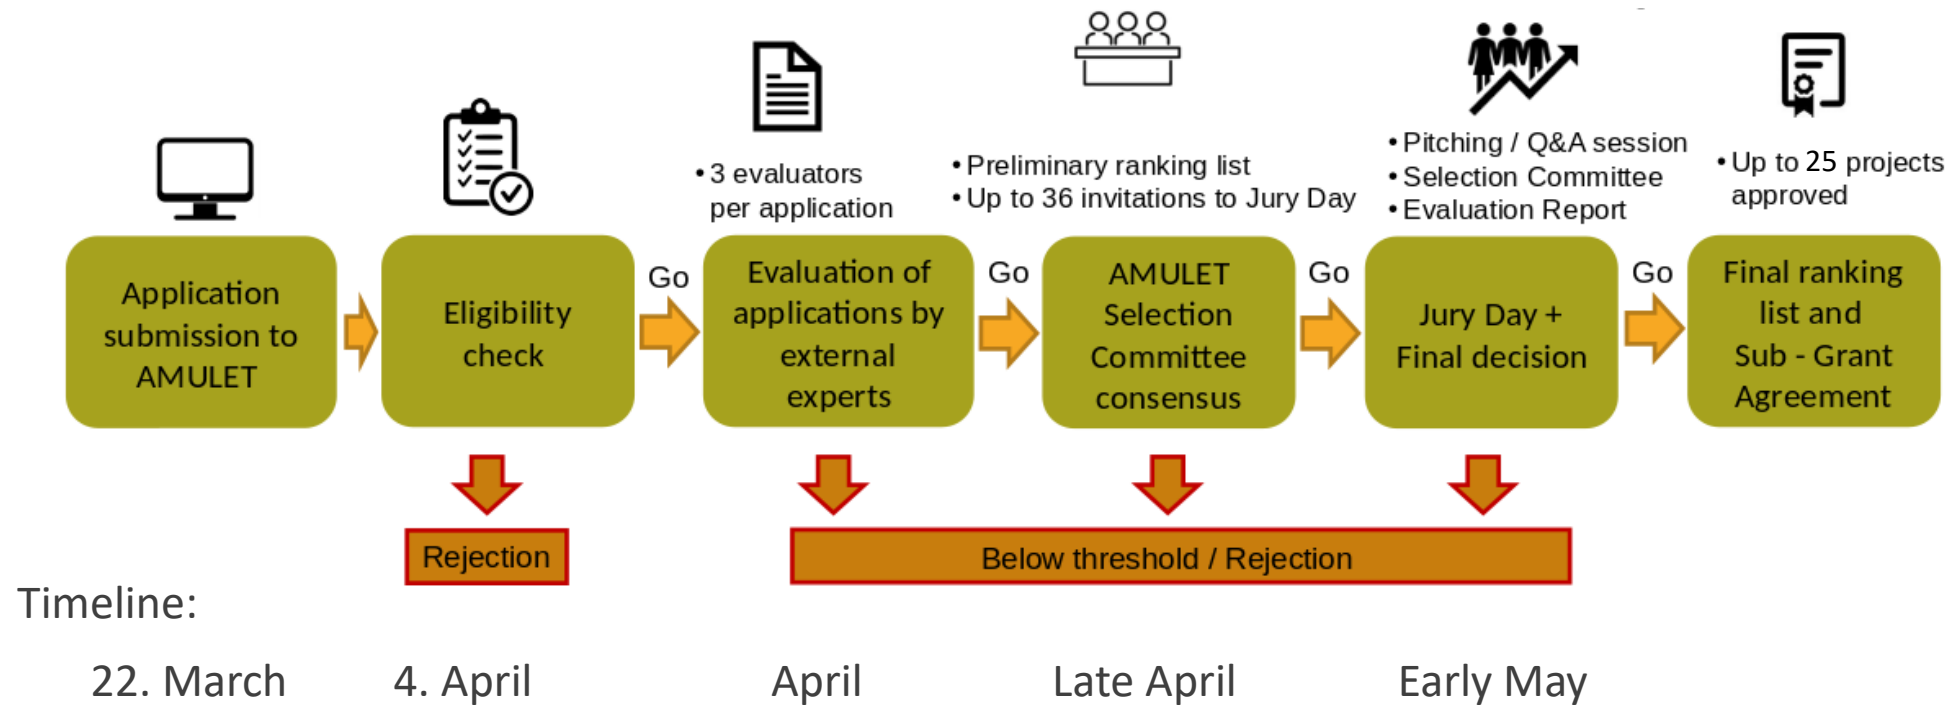

Stage 3

Follow up support for innovation

- **Output: Exploitation plan:** dedicated studies ensuring a successful exploitation (report, supporting documents)
- **Outsourcing these activities to external experts & companies (more than 50% of the Stage 3 budget).**
- **Activities:**
 - marketing strategy, IPR and dedicated studies in the targeted domains (sector, material),
 - effort-intensive analysis (technology scouting and surveillance),
 - foresight studies and scenario planning,
 - tailored market studies including competitive analysis.

Evaluation process

- from application to stage 1

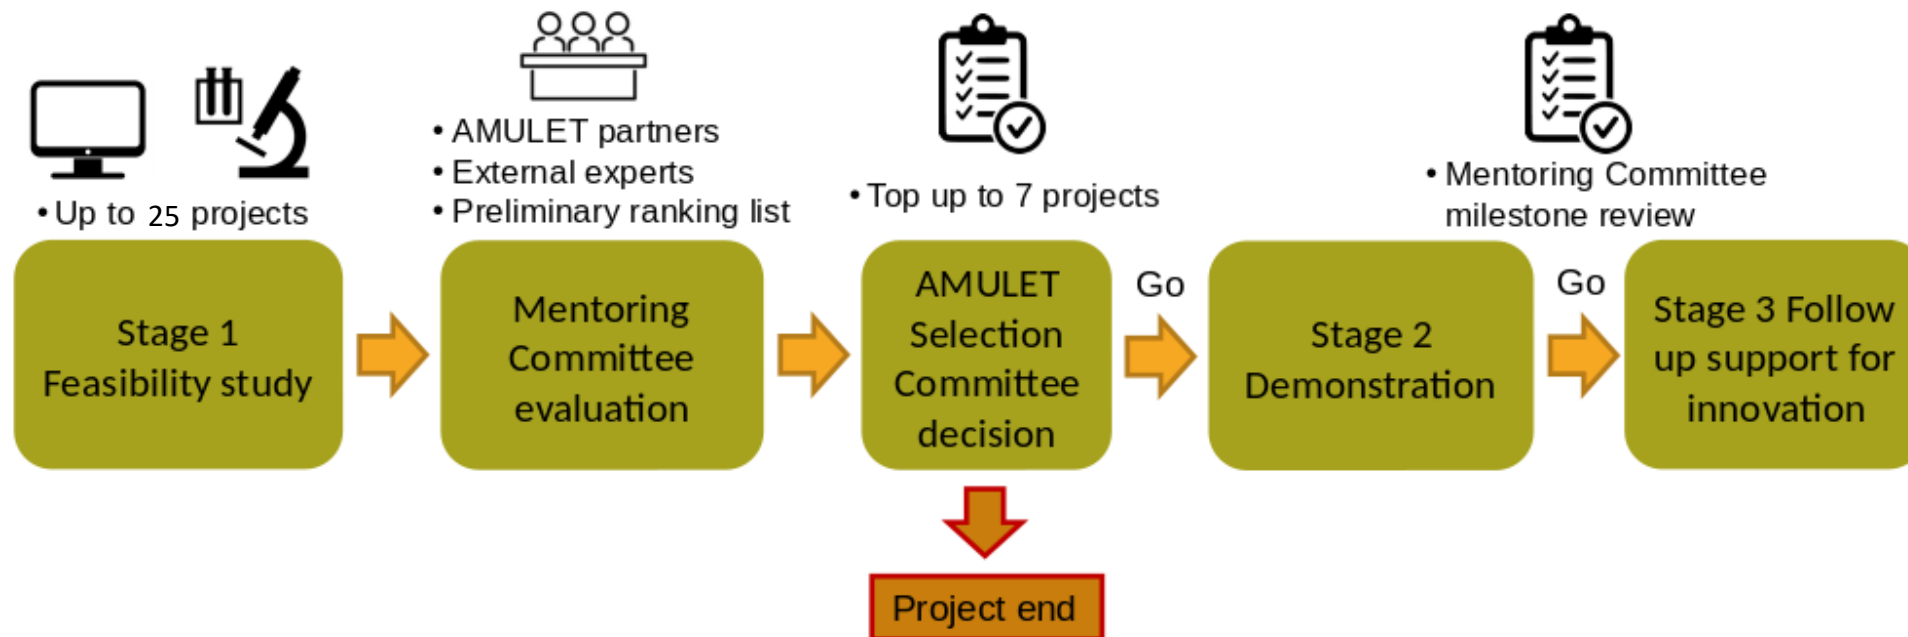

Project start: before July 1st 2023

AMULET support program – from stage 1 to stage 3

3 stages, Milestone Reviews to proceed to next stage

How to proceed?

1. Consult the Industrial Challenges – [AT THIS LINK](#)

AEROSPACE & AERONAUTICS

Polymer-based composites

1_A&A_PBC_LightAIRCRAFT

Title: Wet lay-up/vacuum bag process optimization for lightweight aircraft structures

Challenge summary

Wet lay-up/vacuum bag process optimization for lightweight aircraft structures, comparing different carbon fiber fabrics and core materials regarding weight and mechanical properties.

Scope of the challenge

- Production optimization of carbon fiber reinforced epoxy parts for light-weight aircraft by wet lay-up/vacuum bag process to achieve maximal mechanical performance (tensile-, compressive-, flexural strength, modulus etc.)

Objectives of the challenge

- Objective 1: Producing test panels (monolithic and sandwich) for mechanical testing with wet lay-up technology, materials to be used:
 - 200 gsm carbon fiber woven fabric (aero grade)
 - 160 gsm carbon fiber woven fabric (aero grade)
 - 200 gsm carbon fiber biaxial non-woven fabric
 - 80 gsm UD carbon fiber fabric
 - 300 gsm UD carbon fiber fabric
 - Airex C-70 PVC foam (or equivalent) with 5 mm thickness
 - AHC-Hex-48 aramid paper honeycomb, 48 kg/m³ – 3,2 mm cell size, 8 mm thickness

How to proceed?

EXCELLENCE

In this section, you should provide information on the innovation component of the product/service, its differentiation and on the research component in which it leverages. You should also demonstrate the soundness of the idea you're proposing and how collaboration and integration of different innovation actors fits in it. It will be scored by the AMULET evaluators (with a minimum threshold of 3 out of 5 points) with special attention to the ambition of your project and the innovation you're planning to introduce.

Ambition *

Please, demonstrate to what extent the proposed project is beyond the State of the Art and describe the innovative approach behind it (e.g. ground-breaking objectives, novel concepts and approaches, new products, services or business and organisational models). (max. 2000 characters).

Innovation *

Please, provide information about the level of innovation within the market and about the degree of differentiation that your project will bring. (max. 2000 characters).

Soundness of the approach and credibility *

You should provide concrete and verifiable arguments, and/or evidences that demonstrate the soundness of your approach regard to the premises of the

Announcement of webinars within the topics of AMULET - SMEs in the competition will get priority in participation

All materials and access to coaching services go through

ELCA PLATFORM

<https://elca.innogetcloud.com>

The screenshot displays the AMULET platform's user interface. On the left, a user profile for Nicolò Bertolini is shown, including his role as a Project Developer at Clust-ER MECH, a 35% profile completion rate, and a list of interests such as Lightweight, Design & smart functions, and Mobility. The main content area features a 'Webinar' announcement for 'Strategical digital transformation' on February 7th, 2023. Below this, a 'Listed Webinars' section provides a checklist of topics like R&D, Hackathons, and Corporate Venturing, along with an organizer list including JEC Group, AMULET, and Polymeris. To the right, a 'Past Innovation Webinars' section highlights previous events, including one by Polymeris and another by the Institute of Product Engineering at KIT. The interface is clean and modern, with a navigation bar at the top and a sidebar on the left.

Educational Support to SME's

Available for all European SMEs – not only for SMEs attending the thematic competitions

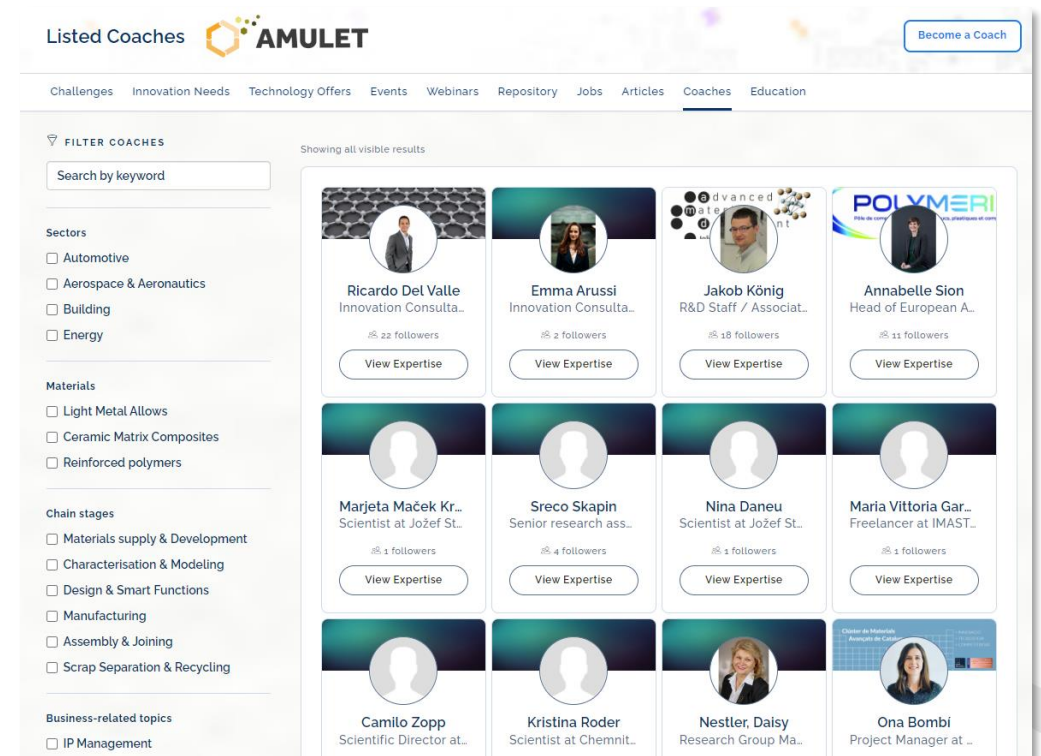

Individual Coaching & Guidance

SMEs can benefit from free coaching service by AMULET experts - each one with different expertise.

Procedure when a request is submitted

- Short intake (written or phone)
- Setting up coaching plan (SME & coach): >5hours
- After completion: evaluation form

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 101005435

AMULET support – Eligible costs

Lump-sum grant provided in each of the stages of the support program to SME beneficiaries (up to 120 k€, max. 60 k€ per SME).

Costs incurred **during the lifetime of the AMULET support.**

Eligible costs categories:

- personnel costs,
- other direct costs (travelling, consumables, equipment, and costs of other goods and services),
- indirect costs (**25% flat rate** of the direct eligible costs),
- Subcontracting: includes tasks/services subcontracted to academic and industry experts (allowed in Stages 2&3, **max. 30% of total lump sum**)

AMULET support – Payments

	STAGE 1: FEASIBILITY PLAN M1- M4 up to 26 consortia		STAGE 2: DEMONSTRATION M5-M13 up to 7 consortia		STAGE 3: FOLLOW UP SUPPORT FOR INNOVATION M14-M15 up to 7 consortia
How much?	40% - up to 9,200€	60%- up to 13,800€	40%- up to 32,000€	60%- up to 48,000€	100%- up to 17,000€
Payment due?	Month 1	Month 4	Month 7	Month 13	Month 15
Requirements?	signature of the Sub- Grant Agreement	validation of the Deliverable(s) established for this stage (i.e. ' Proof of Concept [PoC] ' and ' Business Plan ').	validation of the Deliverable established for mid-term stage (i.e. ' Validation of Results '	successful conclusion and validation of the Deliverable stabilised for this stage (i.e. ' Prototype '	successful conclusion and validation of the Deliverable established for this stage (i.e. ' Exploitation Plan ').
